

COSMETICS

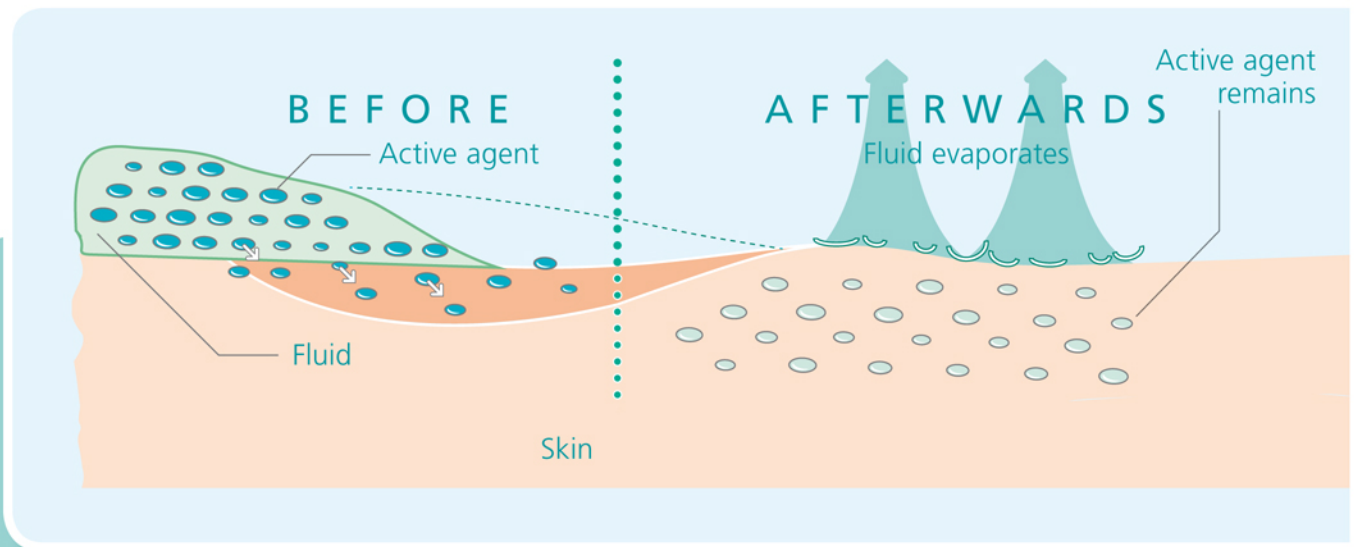

➔ The „lift-off“ principle

intelligent fluids® flow beneath a layer of soiling and then gently lift it off in its entirety. They carry out cleansing without the need for unpleasant chemical additives by using renewable resources which are completely biodegradable. The gentle formula makes sure for instance that the skin keeps the fatty acids it needs and that nails don't become brittle.

→ The „penetration“ principle

intelligent fluids® deliver the agent harmlessly to where it is needed. Additives do not penetrate the skin, instead evaporating or remaining outside. These functional fluids also provide nutrients and conditioning substances in an easily absorbable form.

→ Benefits.

The innovative technology employed in *intelligent fluids*® is safe for mankind and the environment since it is based on biodegradable raw materials used in cosmetics and foodstuffs and does not use controversial or harmful additives. Moreover, the technology performs previously unknown functions thanks to its effectiveness in the sphere of cosmetics.

➔ Example products

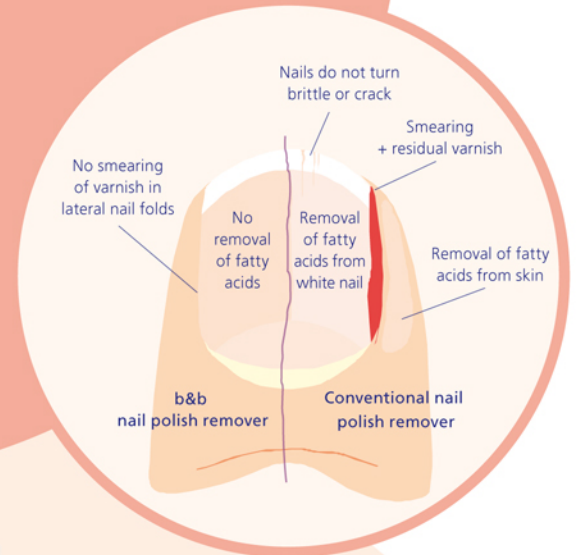

Nail polish remover

bubbles & beyond's nail polish remover gets rid of nail varnish gently yet thoroughly. The intelligent fluid fragments the layer of varnish to be removed and gently lifts it off. Its excellent skin and nail tolerance has already been proven in dermatological trials.

Benefits.

- no removal of fatty acids from skin or nails
- doesn't make nails brittle
- biodegradable ingredients
- dermatologically tested

Hand cleansing lotion

bubbles & beyond's hand cleansing lotion even gets rid of stubborn soiling. Oil, grease, paint, glue and unpleasant odours are all effectively yet gently removed. Thanks to the unique way in which *intelligent fluids*[®] work, the skin is cleaned and simultaneously conditioned.

Benefits.

- maximum cleansing power
- moisturizing and conditioning
- no preservatives
- economical
- dermatologically tested

Dental repair fluid

bubbles & beyond's dental repair fluid is an effective product for supplementary dental care. Its remineralizing and repairing effects successfully help deal with minor defects in tooth enamel and replenish valuable minerals.

Benefits.

- replaces lost and destroyed minerals in tooth enamel
- repairs cracks and porous areas by depositing dentally compatible minerals

Anti-aging foam

bubbles & beyond's anti-aging foam conditions the skin and effectively protects it from aging. Its smart action precisely delivers agents and vitamins to problem areas.

Benefits.

- effectively conditions the skin with nutrients and vitamins
- supports the collagen structure and provides protection from UV rays
- moisturizing, calming, improves circulation
- achieves higher effects with hyaluronic acid
- Traps free radicals to protect skin cells

Nail Polish Remover

環保去甲水

原理：與一般坊間用化學溶解作用方式不同，本產品以物理原理，微細分離產生離型作用。
浸潤→滲透→震動→離型→完成

顏色：透明清澈。

成份：取之環保再生能源原料極容易自然分解。

特色：

- 非化學溶解方式，但分解分離的很透徹乾淨。
- 不傷皮膚、不污染、不殘留累積指甲漆於角質層。
- 不乾澀，並保有原有濕潤。
- 環保，無有機溶劑。
- 安全，非易燃物品。
